The Government has launched the National Logistics Policy (NLP) 2022 to address transportation-related challenges, including achieving 'quick last-mile delivery'. Logistics involves the planning, coordination, storage, and movement of people, raw materials, inventories, equipment, and other resources from a production site to a consumption site. The policy covers process reengineering, digitalization, and multimodal transportation.

ABOUT
INDIAN INSTITUTE OF MATERIALS MANAGEMENT (IIMM)

A Non-profit organization having its National Headquarters at Mumbai, with 52 branches & 19 Chapters across India. Only professional organization in the Country in the field of Materials Management / Supply Management.
A federal set up of over 10,000 Corporate, Individual Members from MNC’s, Private & Public sector including Defense. IIMM, Bangalore Branch has 1200 plus supply chain professionals in its members list.
A very active Charter Member of International Federation of Purchasing and Supply Management (IFPSM), Atlanta – USA, Incorporated in Switzerland which is representing 150,000 members through 44 Member Associations.

IIMM Bangalore Branch is organizing a one-day conference on “National Logistics Policy and Digital Supply Chain Management” as part of its Golden Jubilee year 2023.
You will gain an understanding of and how to leverage technology to improve operational efficiency and decision-making across the supply chain as well as the Objective of National Logistics Policy 2022, Benefits of National Logistics Policy 2022, Government Implications, Launch of the Portal for National Logistics Policy 2022..
IMPACT OF NATIONAL LOGISTICS POLICY AND DIGITAL SUPPLY CHAIN MANAGEMENT

India’s logistics industry will be encouraged to adopt technology through several NLP initiatives. A Unified Logistics Interface Platform (ULIP) will provide a single window for e-logistics. To provide logistics companies with information regarding freight movement throughout the country, seven ministries will be integrated onto a single platform. Assisting with cargo clearance is also one of ULIP’s responsibilities. Aside from supporting blockchain and artificial intelligence adoption in India, the regulation will help integrate the country’s sizable unorganized logistics sector.

Many fields are revitalized by the National Logistics Policy. In order to implement a policy successfully, India is preparing the ground before introducing any policies. It took eight years for NLP to be developed. There are major policy shifts and major decisions being made in order to speed up last-mile delivery, eliminate transport-related issues, save manufacturers time and money, and prevent agricultural products from being wasted. Boosting sector speed, value creation, and entrepreneurship will be achieved through better coordination.

In addition to addressing supply-side restrictions, the policy will provide a roadmap for cutting down on supply chain wastage and logistical expenses.
ABOUT
The Conference

IIMM Bangalore Branch is organizing a one-day conference on "National Logistics Policy and Digital Supply Chain Management" as part of its Golden Jubilee year 2023. You will gain an understanding of and how to leverage technology to improve operational efficiency and decision-making across the supply chain as well as the Objective of National Logistics Policy 2022, Benefits of National Logistics Policy 2022, Government Implications, Launch of the Portal for National Logistics Policy 2022.
